Subject: Application for the position of Cyber Security Engineer at BJIT Ltd.

Dear Sir,

I recently came across your job posting on Bdjobs for an experienced cyber security engineer to join your IT department. I am enthusiastic about applying for the position as I believe I possess all the necessary qualifications to excel in this role. I am a qualified and motivated security engineer, poised to make a significant contribution to your team.

Currently, I am an undergraduate student pursuing a Bachelor's degree in Computer Science at the Islamic University of Technology (IUT), with an expected graduation date in 2024. Despite being in the early stages of my academic journey, I have nurtured a profound passion for cyber security and have actively honed my skills in this domain. I have a robust understanding of the fundamentals of cyber security and have demonstrated success in various Capture the Flag competitions. My enthusiasm and dedication to the field, coupled with my eagerness to learn and adapt, position me as a promising candidate for the role.

I have garnered valuable hands-on experience through my participation in numerous competitions, contributing significantly to my skill set. I am confident that my extensive knowledge of the cyber security life-cycle, complemented by my excellent technical skills, makes me an ideal candidate for this position. I am eager to discuss the role further and appreciate your time in considering my application.

Sincerely,

Tasnimul Hasnat
